Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27 and 62-63 drawn to method for "forming a sensor", classified in class 29, subclass 592.
 - II. Claims 28-46, 52-60 and 64-67, drawn to "a pressure sensor", classified in class 73, subclass 753.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed could be used to form a pressure sensor or any other micro-mechanical or semi-conductor structure.

A telephone call was made to Steven J. Elleman on 8-6-03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement maybe traversed (37 CFR 1.143).
